Cardiac Surgery

Performed by a Registered Medical Specialist in a Licensed Private Hospital. Benefits and limits as per Surgery section.

Breast Reconstruction

Breast Reconstruction performed by a Registered Medical Practitioner in Private Practice.

For all stages of breast reconstruction performed under the same anaesthetic as the initial mastectomy: benefits as per Private Hospitalisation Surgical Benefits section.

For all stages of breast reconstruction performed after the initial mastectomy or not under the same anaesthetic as the initial mastectomy, an amount (payable once only) being the lesser of either the total cost of the reconstruction (including nipple reconstruction and tattooing); or \$15,000. For the avoidance of doubt, this benefit section excludes surgery to the breasts to achieve or correct the symmetry and/or look and/or feel of the breasts. This benefit is only available for surgery following first diagnosis of breast cancer on or after 01 May 2005 and no benefit will be paid under this section unless UniMed has paid for the initial mastectomy.
